Cisco Networking Academy

- 28.6.2021

Projects

Personal website

HTML – SCSS – jQuery

- The main goal on this project was to practice my skills with CSS preprocessor SCSS and module bundler PARCEL.
- I made just a simple one-page website where I could put and showcase my recent projects I have been working on.

Copyright Landing Page

HTML - SCSS

- The main goal on this project was to make a responsive landing page using SCSS.
- It was the first website I made using CSS preprocessor SCSS and also the final project for the SCSS certification.
- Design and all other assets are from **frontendmentor.io**

Jobs Filtering

VUE - SCSS

- The main goal on this project was to make Single Page Application which code is in one big Single File Component using JavaScript reactive framework VUE.js.
- This website uses complex conditional filtering based on five different categories.
- Design and all other assets are from **frontendmentor.io**

Countries

VUE – SCSS – TailwindCSS – API

- The main goal on this project was to make a Single Page Application using JavaScript reactive framework VUE.js which code is split into many smaller Single File Components and loads data from an public API.
- Besides that, I wanted practice my skills with CSS framework TailwindCSS.
- Data used on this project are from **restcountries.eu**
- Design and all other assets are from **frontendmentor.io**
